The **ACTIVE CHARCOAL** that we use is 3 times more adsorbent than normal charcoal.

TRADITIONAL WAX

Hard wax is the most traditional depilation system.

It offers a maximum effectiveness even on rebel hairs, due to a high pulling power derived from a higher application temperature, which opens the pore completely.

Available in 4 different qualities.

Despite being a hot wax, our formulas have a lower melting point and are ideal for sensitive areas like underarm, bikini and face, allowing a total elimination of hair.
